Program Objectives

Upon successful completion of this program, a student will be able to:

- 1. Evaluate Key Concepts, Principles, and Practices:** Students will be able to evaluate the key concepts, principles, and practices of healthcare management.
- 2. Recommend Principles, Concepts, and Best Practices:** Students will be able to recommend healthcare principles, concepts, and best practices in the management of problems and opportunities in the U.S. and global healthcare sectors.
- 3. Integrate Socially-Responsible Practices and Ethical Behavior:** Students will be able to integrate socially-responsible practices and standards of ethical behavior into organizational decision-making in the global healthcare sector.
- 4. Perform Teamwork and Leadership:** Students will be able to perform essential teamwork, leadership, and organizational skills in diverse environments of the global healthcare industry.
- 5. Assess Policy Change:** Students will be able to assess the nature, direction, and timing of change in public and private healthcare policy and practices.
- 6. Evaluate Law and Policy:** Students will be able to evaluate healthcare law, policy, and practices to assess their impacts on humankind.
- 7. Select Financial and Quantitative Methodology:** Students will be able to select appropriate quantitative tools and financial methodologies for the analysis, appraisal, and management of healthcare services.
- 8. Specify Information Management:** Students will be able to specify the use of relevant information management tools in the healthcare sector.

As per International Accreditation Council for Business Education (IACBE) requirements, a student portfolio will be used as proof of meeting the criteria of the MSHAM program objectives and is a requirement. Student portfolios must contain at least one artifact per course. The following is an array of artifacts that a student may consider using for courses: research papers, presentations, assignments, case studies, and other materials pertinent to the course. Only one artifact is required to meet the criterion pertaining to a program objective. If applicable, one artifact may be used to meet the criteria of one or two program objectives.
